<b>Report Subject</b>	Investment Strategy and Manager Summary
<b>Report Author</b>	Pension Finance Manager

### **EXECUTIVE SUMMARY**

The purpose of the Investment Strategy and Manager Summary is to update Committee Members on the performance of the Fund's investment strategy and performance of the Fund's investment managers.

The report covers the quarter ending 31 March 2016.

The Fund experienced a mixed quarter from an Investment Strategy perspective, with positive returns from a number of asset classes, but negative returns from a number of others. Key facts covered in the report are as follows:

- Over the 3 months to 31 March 2016, the Fund's total market value increased by £11.8m to £1,382,461,380.
- As at 31 March 2016, the value of the Fund's liabilities had increased by £130 million to £2,254 million, resulting in a funding level of 61% - this is a decrease in the funding level from 31 December 2015 which was at 65%.
- Over the quarter, total Fund assets returned 1.7% compared with a composite target of 2.0%.

The Fund's investment strategy will be reviewed later in 2016 (on a light touch basis) as part of the Actuarial Valuation Process.

A number of the Fund's investment managers outperformed their respective targets during the quarter. There was particularly strong performance from the Fund's In-House portfolio.

<b>4.00</b>	<b>RISK MANAGEMENT</b>
4.01	<p>The Fund's investment strategy has been designed to provide an appropriate trade off between risk and return. The Fund faces three key investment risks: Equity risk, Interest Rate Risk and Inflation Risk.</p> <p>Diversification of the Fund's growth assets away from equities seeks to reduce the amount of the equity risk (though it should be recognised that Equities remain an important long term source of expected growth). The implementation of the Fund's De-Risking Framework (Flightpath) has been designed to mitigate the Fund's Interest Rate and Inflation Risks.</p>
