

Commitment/Spend and Match Analysis

As at 31st August 2013

Due to the drawn out and bureaucratic process of claiming from the Rural Development Programme it has become apparent that the activity of the projects is not always shown in the best light. All projects have submitted the expenditure that they have committed to activities alongside the actual amount that has come through the claiming process.

Target - This is the amount that the project has said it will spend on each budget heading over the life of the project

Committed Spend - This is money that has been awarded to an activity however has not necessarily been spent. Committed money is then promised to an activity and can not be spent elsewhere. Please note that this amount does include the actual expenditure.

Actual Expenditure - This is the amount of money which has been claimed from the lead body and processed

Contributed - This is funding that has been brought in as match however has not yet been spent and so can not be included in the claim process

Actual Match Spent - This is the match which has been received and spent by the project. The match is supported by all of the necessary evidence of expenditure

An Analysis of the match brought in by Axis 4 projects which has been underwritten by Flintshire County Council has also been included.
