

Licensing committee hearing request.

I would like to put forward the vehicle PO60EHC Renault Master to the licensing committee seeking an exception for this to be used as a private hire vehicle.

I have been made aware that some of the full seats are slightly less than the required 400mm wide at the narrowest point. (I have provided photos to show my measurements)
There are two wheelchair strapping point chairs which have been designed for the safe transport of seated passengers and having the ability to have wheelchairs strapped securely.

I understand the rules are there to safeguard the public, this vehicle has been converted properly and used by the national health service to transport patients for the last 7 plus years. The build quality is apparent as soon as you enter the vehicle and I am positive that the committee will see the same when inspecting on site.

Thanks
