Subject: Re: Planning Application 060811 for residential development at 80-86 Mold Road, Buckley

These plans do not show that there is adequate car parking spaces per household when most people today have 2 or more cars and either they will end up parking on a busy main road or selfishly use the Bistre church car park which is becoming like a public car park so much so than when anyone attending church, for whatever reason be it worship or funeral looking for a space. This is unfair to elderly and anyone with walking problems.
